PROFESSIONAL SUMMARY

An Information Technology graduate with hands-on experience in full-stack web and mobile development, software testing, IT operations support, and AI integration. I am comfortable working across the entire technology stack, from designing clean frontend interfaces and building backend systems to integrating APIs, managing databases, and deploying applications. I write clean, maintainable code, collaborate well in team environments, and adapt quickly to new tools, frameworks, and methodologies. I bring a strong problem-solving mindset, a genuine eagerness to learn, and a consistent drive to contribute meaningfully from day one.

PROFESSIONAL EXPERIENCE

IT Intern | University of Northern Philippines - College of Medicine

2024 – 2025

- Maintained internal web interfaces used by staff for student record management, ensuring consistent UI behavior and system reliability
- Troubleshoot hardware and software issues across the department, resolving problems quickly to minimize downtime
- Documented technical processes and created internal reference guides to support team workflows and knowledge sharing

EDUCATION

Bachelor of Science in Information Technology | University of Northern Philippines

2021 – 2025

Tamag, Vigan City, Ilocos Sur

TECHNICAL SKILLS

Languages: JavaScript, Python, PHP, Dart, SQL

Frontend: React, HTML5, CSS, Tailwind CSS

Mobile: React Native, Flutter

Backend: PHP, Node.js

Databases: MySQL, SQLite

AI & Tools: Amazon Bedrock, Claude Code, Antigravity, Prompt Engineering

Tools & Platforms: Git, GitHub, Vite, Expo, CI/CD pipelines, Agile/Scrum

PROJECTS

React Native Mobile Application | Owen — Smart Nutrition Tracker

React Native · Expo · SQLite · JavaScript

github.com/unsatisfieDg/Owen

- Designed and built a cross-platform nutrition tracking app with barcode scanning, an offline database of food items, BMR/TDEE calculations, streak tracking, and CSV data export
- Implemented a hybrid AI assistant running on-device for capable hardware with cloud fallback, integrating REST APIs and applying prompt engineering to deliver accurate, context-aware responses
- Independently architected the full application including component structure, state management, user authentication, dark mode, and native animations, testing and debugging throughout

Full-Stack Web Application | Coffee Shop Reservation System

PHP · JavaScript · MySQL

github.com/unsatisfieDg/coffee-reservation

- Developed a full-stack reservation platform with user authentication, real-time table booking, and concurrent session management, writing and testing both frontend and backend components
- Applied security best practices including bcrypt password hashing and SQL injection prevention, and conducted code reviews to ensure adherence to quality and coding standards
- Built a clean, modular frontend with clear separation between UI logic and backend operations, and documented system architecture to support long-term maintainability

TRAINING & CERTIFICATIONS

- AWS Generative AI for Developers — Amazon Web Services ID: 4JO1NP43I0XN
- Generative AI for Software Development — DeepLearning.AI ID: KFDK60RB3DZU
- Emerging Technologies in IT — UP Training and Development Center, UP Diliman June 5, 2024
- AI and the Metaverse: Innovations and Applications — Pasay, Metro Manila June 6, 2024
